EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

1. The application has been amended as follows.

The claims have been amended to read as follows.

57-59. (canceled)

Claims 57-59 have been canceled without prejudice for filing in a later application.

Authorization for this Examiner's Amendment was given by telephone by Applicants' agent,

Mr. Gary Tanigawa on February 22, 2006.

2. The following is an examiner's statement of reasons for allowance. The prior art does not reasonably teach or suggest that viral, fungal and gram-negative bacterial markers (antigens) in a sample can be extracted with a nitrous acid solution for use in a subsequent assay to measure the presence of these markers. The prior art discloses that treatment of a virus with nitrous acid may be used to produce viral mutants (see, e.g., Wang et al., "Artificial induction and evaluation of a mild isolate of tomato spotted wilt virus," J Phytopathol 135(3):233-244, 1992, Abstract only enclosed). Treatment of a virus with nitrous acid may also be used to inactivate the virus (see, e.g., Mika et al., "Inactivation of two arboviruses and their associated infectious nucleic acids," J Infectious Dis 113:195-203, 1963, Abstract only enclosed).

Application/Control Number: 10/736,899

Art Unit: 1653

3. Any comments considered necessary by applicant must be submitted no later than

the payment of the issue fee and, to avoid processing delays, should preferably accompany
